

## **STAPLE REMOVAL**

Today your staples were removed. Your incision may weep some serous fluid for the next 24 hours. You will need to wash your hair daily with a mild shampoo (baby shampoo) until the incision is well healed without any remaining scabs. Do not use any vigorous massaging or rubbing on your incision to remove any scabs. Also, use caution when blow drying your hair. You may have numb areas along your incision and could inadvertently cause a burn to your scalp. We recommend that if it is necessary to use a blow dryer only use it on a cool setting.
